

## WHO ARE WE?

Mainguard Technologies is a South Africa company based in Durban on the East Coast of South Africa and was established in 1993, as a provider of Asset Performance Maintenance products and services to Industry. Our product offering services clients in **Factory, Facilities, Fleet and Property Maintenance**.

Over the years, the company has experienced considerable growth and today operates throughout South Africa and Sub equatorial Africa, with an extensive client base from a variety of industries,

We offer a one stop solution for both Asset Maintenance Management and World Class Maintenance Methodologies, to the Industrial sector, in terms of product marketing, training, Implementation and Engineering related projects, product and technical support and a range of systems engineering based added value services.

To enhance our above offering, we have also invested considerably in the development of additional software applications. This together with our unique and industry leading program of Continual Improvement offers a structured road map of productivity improvements to move the client down the road towards the goal of World Class Maintenance.
